D&B Country Risk data from December 2016. For detailed and most up-to-date Country Risk Indicators and trend information, please contact your Bisnode D&B representative.

Any firm or individual who conducts cross-border transactions is exposed to country risk: the risk associated with a country's overall political, economic and commercial performance. Whether you are involved in foreign trade, direct investment or portfolio management, D&B Country Risk products allow you to evaluate country risk.
